PROFESSIONAL SUMMARY

Engineer with good fundamentals in computing, analytical reasoning, and applied problem-solving. I enjoy understanding systems deeply, learning unfamiliar concepts quickly, and building clean, reliable solutions through experimentation. Comfortable working across multiple layers from algorithms and data to APIs and AI pipelines. Motivated by curiosity and long-term learning rather than narrow specialization.

SKILLS

- **Languages:** Java, SQL, Python, C
- **Backend:** Spring Boot, JDBC, Node.js, REST APIs, JWT, Hibernate (JPA)
- **Frontend:** HTML, CSS, JavaScript, React.js
- **Database:** MySQL
- **Tools:** Git, GitHub, Maven, Postman, VS Code, GitHub Actions (CI/CD)
- **Machine Learning & AI:** NumPy, Pandas, TensorFlow, CNN, Random Forest, Signal Processing, Data Preprocessing.
- **Core Concepts:** OOP, Data Structures and Algorithms, DBMS, Operating Systems, Computer Networks, Software Engineering

EXPERIENCE

Full Stack Developer (Part-Time)

April 2026 – Present

GK Healthcare

- Developed and maintained web application modules using Java, Spring Boot, React.js, HTML, CSS, and JavaScript.
- Designed and implemented RESTful APIs and integrated MySQL databases.
- Built responsive frontend interfaces and integrated them with backend services.
- Assisted with debugging, testing, performance optimization, and version control using Git and GitHub.

Java Full Stack Intern

February 2026 – May 2026

KodNest Campus2 Internship

- Trained in Java Full Stack Development including Java, JDBC, Servlets, SQL, HTML, CSS, and JavaScript.
- Developed CRUD applications and REST APIs using Java, MySQL, and Spring Boot.

PROJECTS

AI Placement Preparation Portal

- Developed a full-stack AI-powered placement portal using Spring Boot, React.js, and MySQL.
- Built secure REST APIs with JWT-based authentication and Spring Security.
- Integrated Google Gemini AI for mock interviews and resume analysis.
- Designed responsive dashboards and admin modules for placement management.

Wireless Intraoral Jaw Motion Tracker using Machine Learning

- Developed an IoT-based wireless jaw motion tracking system using an ESP32 and LSM303AGR IMU sensor for real-time jaw movement monitoring.
- Built a wireless data acquisition pipeline to stream sensor data to a Flask application for real-time visualization and machine learning inference.
- Trained and evaluated CNN, Random Forest, and SVM models to classify jaw activities including normal movement, chewing, and grinding.

GitHub: github.com/udaygowda-cell

E-Commerce Order Management System

- Built a full-stack e-commerce order management system using Spring Boot, React.js, and MySQL.
- Designed RESTful APIs for product catalog, cart, and order processing with role-based access control.
- Implemented JWT authentication and integrated payment gateway simulation for end-to-end order flow.

EDUCATION

Bachelor of Engineering (B.E.) – Electronics and Communication Engineering

2023 – 2026

K.V.G College of Engineering, Sullia | CGPA: 8.10

Diploma – Electrical and Electronics Engineering

2020 – 2023

K.V.G Polytechnic, Sullia | CGPA: 7.45

CERTIFICATIONS

- Java Full Stack Internship Certificate – KodNest Campus2 Internship

ACHIEVEMENTS

- Secured 1st Place in SPARK Project Expo for developing an innovative IoT-based engineering project.
- Won 1st Prize in Major Project Expo for project innovation and implementation.
