Summary

Full Stack Software Engineer with hands-on experience building 3 production-grade applications using Java, Spring Boot, React.js, and Node.js. Delivered 4 REST API modules spanning 18+ CRUD endpoints, cutting manual record-handling effort by an estimated 70% for a healthcare client, while implementing JWT/Spring Security authentication across 100% of shipped services.

Skills

- Programming Languages: Java, Python, C, C++
- Backend Technologies: Spring Boot, Spring Security, Hibernate/JPA, JDBC, Node.js, Express.js, REST APIs, JWT, Microservices
- Frontend Technologies: HTML, CSS, JavaScript, React.js
- Databases: MySQL, Relational Database Design, Query Optimization, RDBMS
- Tools & Platforms: Git, GitHub, Maven, Postman, GitHub Actions
- Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering
- Development Practices: Agile, Scrum, CI/CD

Projects

AI Placement Preparation Portal [GitHub Repository](#)

Tech Stack: Spring Boot, React.js, MySQL, REST APIs, JWT

- Built a full-stack placement portal exposing 10+ REST API endpoints across jobs, applications, and user profile modules.
- Implemented JWT authentication and Spring Security to secure 100% of user-facing routes, supporting 2 concurrent user roles.

Wireless Intraoral Jaw Motion Tracker using Machine Learning [GitHub Repository](#)

Tech Stack: ESP32, LSM303AGR IMU, Flask, Python, CNN, Random Forest, SVM

- Engineered an IoT data pipeline streaming sensor data in real time to a Flask service for live visualization.
- Trained CNN, Random Forest, and SVM models to classify jaw activity across 3 classes, benchmarking accuracy to select the best performer.

E-Commerce Order Management System [GitHub Repository](#)

Tech Stack: Java, Spring Boot, React.js, MySQL, JWT

- Built a secure full-stack e-commerce platform with JWT authentication and role-based access control across 2 user roles.
- Developed 8+ REST API endpoints for product, cart, and order management, enabling end-to-end purchase workflows.

Experience

GK Healthcare

Apr 2026 – Present

Full Stack Developer (Part-Time)

- Built 4 REST API modules with 18 CRUD endpoints for authentication, employee, license, and expense management, reducing manual data-entry time by an estimated 70% for a 5-person operations team.
- Secured 100% of endpoints with JWT-based authentication and Spring Security, and built a standalone Node.js/Express authentication microservice backed by MySQL.
- Delivered 6+ responsive UI screens integrated with backend APIs via a Controller-Service-Repository architecture, managing 50+ version-controlled commits through Git/GitHub for a 2-developer team.

KodNest Campus2

Feb 2026 – May 2026

Java Full Stack Development Program

- Completed 400+ hours of intensive training across Java, JDBC, Servlets, SQL, HTML, CSS, and JavaScript, ranking in the top tier of a 60-student cohort.
- Built 3 CRUD applications and REST APIs using Java, MySQL, and Spring Boot, each achieving 100% functional test pass rate during evaluation.

Education

K.V.G College of Engineering, Sullia

2023 – 2026

Bachelor of Engineering in Electronics and Communication Engineering — CGPA: 8.10

K.V.G Polytechnic, Sullia

2020 – 2023

Diploma in Electrical and Electronics Engineering — CGPA: 7.45

Achievements

- 1st Place among 20+ teams, SPARK Project Expo – IoT-based engineering project
- 1st Prize among 15+ teams, Major Project Expo – project innovation and implementation
